4 September 1974

MEMORANDUM FOR: General Wilson

SUBJECT : Military Operations in Built-up Areas

1. I have been contacted by Mr. George Schechter of KETRON, Inc., regarding his desire to present a briefing to interested IC Staff officers on KETRON's work under ARPA funding on Military Operations in Built-up Areas. KETRON has been actively involved in this work over at least the past two or three years and now has a new task assigned by ARPA which will increase the level of effort. George wishes to brief on past actions and future activities.

2. He proposes a half-hour briefing plus desired time for discussion. He is available to do this anytime after 11 September.

3. I believe he desires some intelligence community interest and participation in the work and hopes that stimulation of IC Staff interest will assist in this purpose. His past attempts to obtain IC Staff participation in his annual symposiums have not met with success due to our lack of knowledge of his work and non-availability of staff participants.

4. Subject to your concurrence, I will schedule the briefing for mid-September and will solicit participation from other Staff elements.
